Hey Ramon,

For SQL, we have started auto-grading, we have got SQLite working on the back end, and table generation for more precise questions is well underway.

For Relax, we have finished the Relax tree rendering - with the schema information popover for each node. and are starting database generation refactoring

For both editors, we have added highlights when hovering over database schemas.

We are moving at a comfortable pace.
Kind regards,
Matthew Obirek

That sounds like good progress. I appreciate the update.

Ramon Lawrence
