Hey Ramon,

Here are some things we have worked on since the last meeting

- Rough finish for all autogeneration for SQL - just some polish needed.
- Relax is executing on the backend through direct integration of the Relalg\_Bundle into the pages of Prairielearn - This prevents any need for extra docker containers. thus, auto-grading for Relax queries is done. Relax queries feedback is done.
- AutoGrading for SQL is done. Showing expected output for autogenerated SQL query questions is done. Students are given feedback for all SQL questions.
- Fixed bugs in Database generation.

Everything is coming along well.

Kind regards,  
Matthew Obirek (he/him)

Thank you for the update.

Nice to see great progress on the auto-grading especially Relax.
